sales@betterdensifiers.com

Leasing / Financing Options Available

The FD-35 is designed for high volume densifying applications. It is capable of processing up to 1,000 lbs. of loose EPS, EPE, EPP foam and air freight pallets per hour. The FD-35 comes equipped with a standard input conveyor to facilitate faster load rates. The FD-35 processes foam onsite through a process of shredding while adding heat to densify and extrude densified purge blocks which become the final recyclable product.

All FD Series foam densifiers have passed rigorous air quality testing for health and environmental safety. Better Densifiers provides equipment financing and leasing programs, as well as a one-year warranty on all parts and labor.
