

# FD-88

## Universal Densifier

**888.350.2079**

**sales@betterdensifiers.com**

**Leasing / Financing Options Available**

The FD-88 is the flagship of our product line. Like the FD-35, it is capable of processing up to 1,000 lbs. of loose EPS, EPE and EPP foam per hour. What sets the FD-88 apart is its' unique shredding process enabling it to handle a very broad array of materials including Expanded Polystyrene(EPS), Expanded Polyethylene(EPE), Expanded Polypropylene(EPP), Bubble Wrap, Film, PE Foam Sheet and Coroplast. The FD-88 processes foam onsite through a process of shredding while adding heat to densify and extrude densified purge blocks which become the final recyclable product.

All FD Series foam densifiers have passed rigorous air quality testing for health and environmental safety. Better Densifiers provides equipment financing and leasing programs, as well as a one-year warranty on all parts and labor.
