

FD-3600

The FD-3600 is one of our cold compaction densifiers. It is a hand fed unit capable of processing up to 700 lbs. of EPS per hour. The FD-3600 shreds loose foam and shuttles it into a compaction chamber via an auger. The material is then compacted into block form easily stackable on a pallet and ready to be picked up by a recycler. The FD-3600 densifies expanded polystyrene (EPS) and polyisocyanurate (PIR). All FD Series foam densifiers have passed rigorous air quality testing for health and environmental safety.

Better Densifiers provides equipment financing and leasing programs, as well as a one-year warranty on all parts and labor.

Ask about our turn-key set-up and training packages

Motor HP: 30 HP
Voltage: Three Phase 208V/230V/460V
Weight: 5,732 Lbs.
Throughput: Up to 700 Lbs./Hour
Infeed Type: Manual Feed
Infeed Dimensions: 58.5" x 36"
Machine Dimensions: 132" x 109" x 78"
Materials Processed: EPS, PIR
Volume Reduction Ratio: 60:1
Options: Foam Shredder, Bag/Silo Feed System, Conveyor
